

ARCHITECTURAL DESIGNER

Preen is an international, award-winning hospitality design and architecture firm.

We are seeking an exceptional teammate to join our flock. We are looking for a self-directed team player who can't wait to get onto the court. Our ideal candidate loves design, is organized, is a great communicator and overall approaches life with joy and a how-can-I-be-of-service attitude.

Our office is small and powerful. We specialize in restaurants and hotels. We work closely together to create real value and the experience of expression for our clients. We don't just design space, we help build businesses that matter, and we are looking for someone that believes in contributing to this greater mission.

We manage both the architectural and the interior design functions, so day-to-day tasks could range from coordination of engineering to selection of tableware....however, what we need right now, is a motivated person to jump in and help us with production. We work in Revit so that is a must.

We work in a studio environment and you will be privy to all aspects of a project's development. Personal and professional growth is encouraged and the access to greater responsibility is in being accountable for it.

We ask that you have a degree in Architecture (Masters preferred), have a car or have a plan that will get you to job sites, be permanently legal to work in the US and like animals as we have two parrots in the office.

We are located in Chinatown LA. If you are interested, please email your cover letter, resume, references and portfolio to Alexis at info@preeninc.com.
