

Project Architect / Project Manager  
CSA Architects, LLP  
Los Angeles, CA 91364

CSA Architects is seeking talented individuals to join our growing architectural design practice. We have a range of ongoing and upcoming projects that includes ground-up new construction, renovation of existing commercial buildings, and interiors projects. Our clients include Corporations, Healthcare, Government, Developers, Universities, and individuals. Project types include Office, Healthcare, High-tech Engineering Design and Testing Labs, Hospitality, Education, Mixed-Use, Multi and Single Family Residential, and other unique and challenging project types.

Please see our company web site for additional information about our firm: [www.csaarc.com](http://www.csaarc.com)

Qualifications required for the Project Architect / Project Manager position:

- 6 – 10 years minimum professional Architectural experience with direct involvement working on multiple projects of varying construction types and through the various phases of architectural projects.
- Education: Degree in Architecture from an accredited University. Project Architect position requires a current California Architect License. Qualified applicants without a current California Architect License will be considered for a Project Manager position.
- Direct practical experience over multiple projects utilizing AutoCAD and Revit is required.
- Exceptional understanding of the architectural design and technical documentation process with emphasis on building systems integration.
- Strong organizational capabilities, excellent team management skills, and successful client relationship experience are necessary.
- Verbal and written communication and presentation skills are required. Must be proficient with MS Word, Excel, Outlook, PowerPoint, and Project (or other scheduling application), Adobe Acrobat and/or Bluebeam Revu, and other programs in common use in the architecture profession.

Salary Range \$95K to \$120K
